Taekwondo - Udo Moenig 2015-04-10 This book provides a comprehensive overview of the historical, political, and technical evolution of taekwondo. Many of the supposedly 'traditional' and 'ancient' Korean cultural elements attached to taekwondo are, in fact, remnants of East Asia's modernization drive, and largely inherited from the Japanese martial arts. The current historical portrayal has created an obstacle to a clear understanding of the history of taekwondo, and presents problems and contradictions in philosophy and training methodology. Using rich empirical data, including interviews with leading figures in the field, this book brings together martial arts philosophy with an analysis of the historical aspects and the development of taekwondo, and provides a detailed comparison of Korean and Japanese techniques. It challenges subsequent psychology surrounding taekwondo to provide a more accurate picture of taekwondo's evolution.
